

## Lab Accessories

### RNase-Free Gloves

Gloves are certified free of RNase and DNase contamination.

- Produced specifically for use in nucleic acid research.
- Made of high quality nitrile.
- Not made from natural rubber latex.
- Fully textured surface for easier gripping of objects.
- Powder free to help reduce the risk of skin irritation.
- Beaded, tear resistant cuffs.
- Certified to be free of all RNase and DNase contamination
- Double bagged for additional contaminant protection.
- Serves as a reliable contaminant-free source for RNA work.

### UltraClean™ Lab Cleaner

Surface cleaner to remove nuclease and nucleic acid contaminants.

- Efficiently removes nuclease (DNase and RNase) and nucleic acid (DNA and RNA) contamination.
- Easily decontaminates a variety of surfaces and labware.
- Perfect for pipettors, benchtops, glassware and more.
- Ideal for labware which cannot be autoclaved.
- Replaces time-consuming processes such as DEPC treatments.
- Easily wiped or rinsed away.
- Leaves instruments residue free.
- Product is ready-to-use.
- Useful for RNA, DNA and PCR experiments.
