

Petaka ET™

with Magnetic Wipers!

Covering the ambit of your entire cell culture work in a pocket device!

Cut short on trypsinization procedures!

- 
- 
- *A still higher version of Petaka.... with magnetic biologically inert plastic Wipers infused with paramagnetic particles enclosed inside to avoid the cumbersome steps such as trypsinization, etc.*
 - *Save enzymes and other chemicals (Trypsin-EDTA) to detach adherent cells from the surface of the cell culture device and thereby doing away with several biologicals which can lead to contamination and compromise the cell culture as a whole*
 - *Petaka ET™ eliminates the likelihood of any cell damage or protein denaturation due to the proteolytic activity of trypsin*
