

Water DNA Isolation

UltraClean™ Water DNA Isolation Kit (0.45 µm)

Other Products

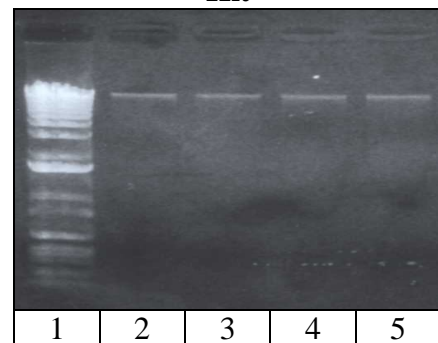

- UltraClean™ Water DNA Isolation Kit (0.45 µm)
- UltraClean™ Water DNA Isolation Kit (0.22 µm)
- UltraClean™ Water DNA Isolation Kit (No filters)
- Water Filters
- UltraClean™ Water DNA Isolation Kit Components

For isolation of DNA from microorganisms in small or large volume water samples.

Product Features and Benefits

- ☐ **Rapid Protocol** - Purify DNA from microorganisms in water in 35 minutes.
- ☐ **High Quality DNA** - Yields DNA greater than 50 kb in length ready for PCR, restriction digests and other downstream applications.
- ☐ **Flexible Format** - Useful for small or large volumes of water.
- ☐ **Complete** - All tubes and reagents required are included in kit and ready to use.
- ☐ **Safe** - No hazardous organic solvents or enzymes required.

DNA isolated from sewage treatment plant in Carlsbad, California using the UltraClean™ Water DNA Isolation Kit

Lane 1: 1 kb Marker

Lanes 2, 3: Primary treated sewage

Lanes 4, 5: Secondary treated sewage
