

Product Data Sheet

Purified Mouse IgA control

Cat # 20102-100 **Size:** 100 ug
Form: Liquid Lyophilized **Storage:** -20oC

Description

Mouse myeloma cells were grown in mice and ascites fluid collected. The IgA was purified by a combination salt fractionation and column chromatography (Sephadex, and DEAE-ion exchange columns). The resulting preparation was judged to be >95% pure by immuno electrophoresis (IEP) and SDS-PAGE. The purified protein is IgA Kappa.

Form and Storage

Mouse IgA is provided as liquid (1 mg/ml in PBS pH 7.4 + 0.05% sodium azide as preservative) or in lyophilized form. The product should be **stored at 4°C** for short term and -20oC for long term storage. It is stable for a minimum of 1 year at -20oC.

The **lyophilized products** should be dissolved in PBS, pH 7.4 to prepare desired concentration by gentle rocking or vortexing at room temperature. Centrifuge the solution briefly (10,000 g, 15 min) to remove any particulate matter. It should be aliquoted and stored frozen for long term use.

Suggested Uses

This preparation of mouse IgA is suitable for coating the ELISA plates or as a isotype control for ELISA, dot blot, Western or IHC or other immunoassays.

Antibody concentration must be optimized for each application under defined experimental conditions.

MSDS: This product is considered non-hazardous as defined by OSHA (CFR 1910.1200. Nov 25, 1983). It can be disposed of in the drain.

Country of origin: USA

This product is for in vitro research use only.
