

Product Data Sheet

Anti-Pig IgG (Fc)-Antibodies and conjugates

Cat# 90419	Rabbit Anti-Pig IgG (Fc), unlabeled	Size: 0.5 mg	Form: Liquid	Powder
Cat# 90420	Rabbit Anti-Pig IgG (Fc)-HRP conjugate	Size: 0.5 ml	Form: Liquid	Powder
Cat# 90430	Rabbit Anti-Pig IgG (Fc)-FITC labeled	Size: 0.5 ml	Form: Liquid	Powder
Cat# 90440	Rabbit Anti-Pig IgG (Fc)-Biotin labeled	Size: 0.5 ml	Form: Liquid	Powder

Description

Rabbits were immunized with antigen grade **Pig IgG (Fc)**. Antibodies have been isolated using ammonium sulfate, ion-exchange, and affinity chromatography to remove non-specific antibodies. Purified anti-Pig IgG (Fc) is supplied as unlabeled IgG, HRP, FITC and Biotin-conjugate.

Specificity of antibody has been tested using IEP, immunodiffusion, and ELISA. The product reacts with Pig IgG (Fc) with no significant reactivity with Pig IgG (Fab2), IgM or other serum proteins. The antibody may recognize other species IgG (Fc).

Form and Storage

Cat# 90419, unlabeled

The antibody is supplied in PBS, pH 7.4, and 0.05% azide in either **lyophilized** (0.5 mg) or **liquid** form (0.5 mg/ml). Reconstitute powder in PBS in 0.5 ml to prepare 1 mg/ml solution. Store at -20°C in suitable aliquots. Stability is ~6-12 months. Do not freeze and thaw.

Cat# 90420, HRP-conjugate

Purified antibody was coupled to HRP (RZ>3.0) using periodate method. The molar enzyme to protein (E/P) ratio = 4.0. The antibody is supplied in stabilizing buffer, 0.1% prolcin-300 as preservative in either **lyophilized** (0.5 ml) or **liquid** form (0.5 ml). Reconstitute powder in PBS in 1 ml. Store at 4°C in suitable aliquots. Stability is ~6-12 months. Do not freeze and thaw.

Suggested conjugate dilutions are 1:1,000-1:10,000 ELISA, 1:1K-1:5K for western, and 1:200-1:1000 (IHC).

Cat# 90430, FITC-conjugate

Purified anti-Pig IgG (Fc) antibody was coupled to FITC at F/P ratio ~4-5:1. The antibody is supplied in PBS, pH 7.4, 0.2% BSA and 0.05% azide in either **lyophilized** (0.5 ml) or **liquid** form (0.5 mg/0.5 ml).

Reconstitute powder in PBS in 0.5 ml to prepare 1 mg/ml solution. Store at -20°C in suitable aliquots. Stability is ~6-12 months. Do not freeze and thaw.

Suggested conjugate dilutions are 1:200-1:2000 for immunofluorescence.

Absorption Wavelength: 495 nm

Emission Wavelength: 528 nm

Cat# 90440, Biotin-conjugate

Purified anti-Pig IgG (H+L) antibody was coupled to Biotin using ADI Biotinylation kit # 80300 at F/P ratio ~10-20:1. The antibody is supplied in PBS, pH 7.4, 0.2% BSA and 0.05% azide in either **lyophilized** (0.5 mg) or **liquid** form (0.5 mg/0.5 ml). Reconstitute powder in PBS in 0.5 ml to prepare 1 mg/ml solution. Store at -20°C in suitable aliquots. Stability is ~6-12 months. Do not freeze and thaw.

Suggested conjugate dilutions are 1:5,000-1:30,000 ELISA.

Recommended Working Dilution for ELISA

Working dilution for the specific application should be determined by the investigator to obtain the best conditions. Working solution should be prepared immediately before use and diluted solution should be discarded.

All products are for In vitro research use only.
