

## Product Data Sheet

---

**Cat#:** AD-126-U

**Cat#:** AD-126-B, Biotin labeled

**Cat#:** AD-126-F, FITC labeled

**Product Description:** L-Selectin (LD201)

**Aptamer Type:** DNA

**Sequence:** 5'-

CTACCTACGATCTGACTAGCCAAGGTAACCAGTACAAGGTGCTAAACGTAATGGCTTCGGCTTACTCTCATGTAGTTCC-3'; 79-mer

**Size** 100 nM

**Mol. Wt:** 24243.79 g/mole

**Purity:** >95%

**Affinity:** 1.8 nM (reported value)

**Comments:** Contains a horseradish peroxidase-like DNAzyme with a region complementary to the Lysozyme Aptamer DNA Blocker (highlighted green in the structure). In the presence of the blocker, the two oligonucleotides hybridize, inactivating the DNAzyme.

**Notes:** Selectins participate in the initial events leading to leukocyte extravasation from the blood into tissues and are targets for antiinflammatory agents. In vitro, the deoxyoligonucleotides inhibit L-selectin binding to immobilized SLEX in static assays and inhibit L-selectin-mediated rolling of human lymphocytes and neutrophils on cytokine-activated endothelial cells in flow-based assays. These aptamers also block L-selectin-dependent lymphocyte trafficking in vivo, indicating their potential utility as therapeutics.
