Mouse Anti-Human CD45RA-FITC conjugate

PRODUCT INFORMATION

CLONE: HI100
ISOTYPE: Mouse IgG2a, κ
WS.No.: IV N906
Product Forms: Purified, FITC conjugation, PE conjugation.
SIZE: 25 Tests

DESCRIPTION

CD45RA McAb recognizes the 205/220KD isoform of leukocyte common antigens expressed on about 40-50% of peripheral CD4⁺ T cells, 50% of peripheral CD8⁺ T cells and on a portion of B cells and monocytes. Studies have shown that expression of different isoform is characteristic of differentiated subset of hematopoietic cells (for instance CD45RA on naïve/ resting T cells and CD45RD on memory/ activated T cells; CD45RA on medullary thymocytes and CD45RD on cortical thymocytes). It is also reported that the pattern of 87% of B-ALL is CD45RA⁺/ CD45RO⁻, 70% of T-ALL is CD45RA⁻/ CD45RD⁺ and 78% of B-ALL is CD45RA⁺/ CD45RO⁺.

PREPARATION

The monoclonal antibody is purified from ascites by protein G affinity chromatography and is conjugated with FITC, R-PE under optimum conditions.

USAGE

The purified reagent is effective for indirect immunofluorescence staining of human cells for flow cytometric analysis and is tested for immunohistochemical staining of acetone-fixed frozen sections and formalin-fixed paraffin sections.

The conjugated reagent (FITC, R-PE) is tested for flow cytometric analysis using 20µl/10⁶ cells or 100µl peripheral blood cells.

STORAGE

For purified forms, long term storage at -20°C.

For conjugated forms, storage at 4°C, should not be frozen and avoid prolonged exposure to light.
