**Mouse Anti-Human CD45RA-PE Cy5 conjugate**

**PRODUCT INFORMATION**

**CLONE:** HI100  
**ISOTYPE:** Mouse IgG2a, κ  
**WS.No.:** IV N906  
**Product Forms:** Purified, FITC conjugation, PE conjugation.  
**SIZE:** 25 Tests

**DESCRIPTION**

CD45RA McAb recognizes the 205/220KD isoform of leukocyte common antigens expressed on about 40-50% of peripheral CD4<sup>+</sup> T cells, 50% of peripheral CD8<sup>+</sup> T cells and on a portion of B cells and monocytes. Studies have shown that expression of different isoform is characteristic of differentiated subset of hematopoietic cells (for instance CD45RA on naïve/ resting T cells and CD45RD on memory/ activated T cells; CD45RA on medullary thymocytes and CD45RD on cortical thymocytes). It is also reported that the pattern of 87% of B-ALL is CD45RA<sup>+</sup>/ CD45RO<sup>-</sup>, 70% of T-ALL is CD45RA<sup>-</sup>/ CD45RD<sup>+</sup> and 78% of B-ALL is CD45RA<sup>+</sup>/ CD45RO<sup>+</sup>.

**PREPARATION**

The monoclonal antibody is purified from ascites by protein G affinity chromatography and is conjugated with FITC, R-PE under optimum conditions.

**USAGE**

The purified reagent is effective for indirect immunofluorescence staining of human cells for flow cytometric analysis and is tested for immunohistochemical staining of acetone-fixed frozen sections and formalin-fixed paraffin sections.

The conjugated reagent (FITC, R-PE) is tested for flow cytometric analysis using 20µl/10<sup>6</sup> cells or 100µl peripheral blood cells.

**STORAGE**

For purified forms, long term storage at -20°C.

For conjugated forms, storage at 4°C, should not be frozen and avoid prolonged exposure to light.
