

Item Name Hep G2 Cell Slide

Cat# HCLS-17011

Size: 1 package of 5 slides

Cell Lines (15 yrs, Male) liver, hepatocellular carcinoma

Source Human

Buffer: In order to keep the antigens in their native forms, cells were fixed in 4% paraformaldehyde.

Store Can be stored for up to 3 months at 4°C under desiccate conditions.

	<p>Recommended Usage</p> <p>This product is provided for immunocytochemical analysis of protein and protein-protein interaction.</p> <p>Cell Slide preparation</p> <p>Human Hep G2 cells were cultured in Minimum Essential Medium (Eagle) with 2 mM L-glutamine and harvested at the log phase of growth. The Hep G2 cells were fixed in 4% paraformaldehyde and arrayed on a 12-well (5 mm) adhesive coated slide, with each well's surface specifically treated to enhance cellular attachment and to minimize background staining. Each well was loaded with approximately 7.5 x 10³ Hep G2 cells. A follow-up heat dehydration process was done to ensure the attachment of Hep G2 cells and the stability of cellular proteins.</p> <p>All items are for in vitro research use only</p>
