

## Product Specification Sheet

### Mouse Haptoglobin Protein and Antibodies

Cat # HGLB11-A	Rabbit Anti-Mouse Haptoglobin IgG, aff pure	<b>SIZE:</b> 100 ul
Cat # HGLB11-C	Mouse Haptoglobin protein control for Western blot	<b>SIZE:</b> 100 ul
Cat # HGLB11-N-25	Purified Mouse Haptoglobin protein	<b>SIZE:</b> 25 ug

Haptoglobin (also known as Haptoglobin, alpha polypeptide antibody, Haptoglobin, beta polypeptide antibody, HP antibody, Hp2 alpha antibody, HP2 ALPHA2 antibody, HPA1S antibody, HPT antibody, MGC111141 antibody as Hp) is a protein that in humans is encoded by the HP gene. In blood plasma, haptoglobin binds free hemoglobin (Hb) released from erythrocytes with high affinity and thereby inhibits its oxidative activity. The haptoglobin-hemoglobin complex will then be removed by the reticulo-endothelial system (mostly the spleen).

This HP gene encodes a precursor that is processed to yield both alpha and beta chains, which subsequently combine as a tetramer to produce haptoglobin. Haptoglobin functions to bind free plasma hemoglobin, which allows degradative enzymes to gain access to the hemoglobin while at the same time preventing loss of iron through the kidneys and protecting the kidneys from damage by hemoglobin. Haptoglobin is produced mostly by hepatocytes but also by other tissues: e.g., skin, lung, and kidney. In addition, the haptoglobin gene is expressed in murine and human adipose tissue.

Haptoglobin, in its simplest form, consists of two  $\alpha$ - and two  $\beta$ -chains, connected by disulfide bridges. Hp exists in two allelic forms in the human population, so-called Hp1 and Hp2, the latter one having arisen due to the partial duplication of Hp1 gene. Three phenotypes of Hp, therefore, are found in humans: Hp1-1, Hp2-1, and Hp2-2. Hp of different phenotypes have been shown to bind hemoglobin with different affinities, with Hp2-2 being the weakest binder. The amino acid sequence of Hp1-1 consists of 406 aa, it has molecular weight of about 45 kDa.

#### Source of Antigen, Antibodies

<b>Antigen</b>	Pure Mouse haptoglobin protein
<b>Ab Host/type</b>	Rabbit, polyclonal IgG (cat # HGLB11-A), purified over affinity column
<b>2-Ab</b>	Goat Anti-rabbit IgG-HRP cat # 20320 (AP, biotin, FITC conjugates also available)
<b>-ve control</b>	# 20009-1, Rabbit (non-immune) IgG, purified, suitable for ELISA, Western, IHC as -ve control

#### #HGLB11-N-25, Purified Mouse Haptoglobin

Hp was purified from Mouse plasma using proprietary techniques (>95% pure, contains 40 kda beta and 10 kda alpha chains). It is supplied lyophilized in 10 mM Tris, 150 mM NaCl, 0.05% azide in solution or lyophilized in the same buffer. Reconstitute powder in distilled water or in other buffers. Store powder at -20oC and make aliquots of the stock solution and store frozen at -20oC. Avoid repeated freeze and thaw.

#### #HGLB11-C, Mouse Haptoglobin control for Western blot

Purified Mouse Haptoglobin (>95% pure, contains 40 kda beta and 10 kda alpha chains) for Western blot +ve control (**Cat # HGLB11-C**) is supplied in SDS-PAGE sample buffer (reduced). Load 10 ul/lane of **HGLB11-C** for good visibility with antibody Cat # **HGLB11-A**.

Store at -20oC in suitable size aliquots. SDS may crystallize in cold conditions. It should redissolve by warming before taking it from the stock. It should be heated once prior to loading on gels. If the product has been stored for several weeks, then it may be preferable to add 5 ul of fresh 2x sample buffer per 10 ul of the **HGLB11-C** solution prior to heating and loading on gels. This preparation is not biologically active. It is not suitable for ELISA or other applications where native protein is required. Do not freeze, thaw, or heat repeatedly

#### Form & Storage of Antibodies/Peptide Control

##### Affinity pure IgG

100 ug/100ul solution lyophilized powder  
Supplied in Buffer: PBS+

**Reconstitute powder in PBS at 1 mg/ml.**

##### Storage

**Short-term:** unopened, undiluted liquid vials at -20°C and powder at 4°C or -20°C.

**Long-term:** at -20°C or below in suitable aliquots after reconstitution. Do not freeze and thaw and store working, diluted solutions.

**Stability:** 6-12 months at -20°C or below.

**Shipping:** 4°C for solutions and room temp for powder.

#### Recommended Usage

**ELISA:** Dilution 1:1,000 is recommended.

**Suitable for Western Blot.**

#### Specificity & Cross-reactivity

Anti-Mouse haptoglobin antibody reacts with Mouse haptoglobin. Antibody reactivity with other species not studied. Antibodies to human, mouse, rat, dog, cat, horse haptoglobin and purified proteins are also available.
