

ImmunoStrip® for Tobacco etch virus (TEV)

The *Tobacco etch virus* (TEV) ImmunoStrip® is used to detect the presence of TEV in ornamental and vegetable crops. TEV is a Potyvirus that naturally infects members of the solanaceae family. It is an aphid transmitted pathogen. Visual symptoms include mottling, puckering, and wrinkling on leaves of infected plants. ImmunoStrips® are the perfect screening tool for use in the field, greenhouse, and the lab.
