### ELISA Microplate Automatic Washer Cat # MPW-30

- Fully automatic. It is one of the most economical full-featured ELISA plate washers. It offers single or double aspirations and superior dispensing precision. Easy on-screen programming using full keyboard and 24-character, 2-line LCD display.
  - Washes flat, round, and V-bottom plates and strips.
  - No user adjustments required. Automatic calibration, alignment, and last row detection (use less than full plate and stop at the last row).
  - Large, non-volatile memory stores at least 50 user wash protocols.
  - Precision operation with constant monitoring of vacuum and pressure. Pump cycles only when necessary for quiet operation.
  - 12 and 16 positions wash heads available as accessories.
  - Auto-water detection of waste and buffers bottle levels. Audible beep when waster bottle is full and when buffers are empty.
- Operates on 110V or 220V. 1 year warranty.

**Microplate Washer  
Cat # MPW-30**

### ELISA Plate Manual Washer Cat # MPW-60

- An inexpensive, low volume manual ELISA Washers.
- No more squirt bottle washing. Reduce exposure to the potential dangers of splashing biohazards with the manual washer.
- Aspirating and dispensing are controlled by manual push buttons.
- Easy to use and maintain, includes an 8-probe manifold, a 1L wash bottle, and a 1L safe plastic bottle with a full water level sensor (stops filling if waste bottle is full).
- Operates on 110V or 220V. 1 year warranty

### ELISA Plate Incubator & Shaker Cat # MPS-800

- Holds two 96 well microplates for mixing and/or incubating.
  - Digitally controlled 8-speed shaker with orbital mixing from 575 to 1500 rpm.
  - Temperature adjustable from ambient to 40°C with resolution of 0.1 °C.
  - Digital timer controls shaking or can be operated independently as a timer.
  - Compact and easy to operate.
  - Outer tinted cover provides further insulation and protection from light.
  - NRTL and CE certified
- Operates on 110V or 220V. 1 year warranty
