

Product Specification Sheet

Mouse/Rat/Human OREXIN-A (Hypocretin-A) Fragment

Cat. OXA14-P	Mouse/rat/human Orexin-A peptide 14-33 aa Fragment			
SIZE:	100 ug	1 mg	5 mg	10 mg
FORM:	Soln	Lyophilized		

Several peptides associated with feeding behavior have been reported recently. Orexins (**Orexin-A** and **Orexin-B**) are a family of hypothalamic neuropeptides selectively expressed in the hypothalamus (1-2). Orexin-A and Orexin-B are derived from the same precursor (Prepro-orexin) by proteolytic cleavage. **Prepro-orexin** is 130 amino acid long peptide with a putative 33 AA secretory sequence, a hydrophobic core followed by residues with small polar side chains. The expression was detected in brain and to a small extent in testis (1-2). These neuropeptides bind and activate two closely related **Orexin receptors**--G-protein coupled receptors (GPCRs) **OX1R** and **OX2R**.

Source of peptide

A peptide sequence (**designated OXA14-P**) corresponding to 14-33 aa (CRL YEL LHG AGN HAA GIL TL-amide; mol wt. 2123.00) of the mouse (same in rat and human) Orexin A (1) was synthesized and purified by HPLC.

Full length Orexin-A produced by us has been shown to be biologically active (3).

Form & Storage of Peptides

Control/blocking peptide

100 ug/100 ul 50 ug/50 ul
 solution lyophilized powder
 Buffer: PBS, pH 7.5 and 0.05% sodium azide
Reconstitute in the original vol. Of water

Storage

Short-term: unopened, undiluted vials for less than a week at 4oC.

Long-term: at -20C or below in suitable aliquots after reconstitution. Do not freeze and thaw and store working, diluted solutions.

Stability: 6-12 months at -20oC or below.
Shipping: 4oC for solutions and room temp for powder.
