

<b>Name</b>	<b>Argipressin Acetate</b>
<b>Cat #</b>	PP-1060
<b>Size</b>	1 g, 10 g, 100, g and bulk custom packages
<b>CAS#</b>	113-79-1
<b>Mol. Mass</b>	1084.23
<b>Formula</b>	C <sub>46</sub> H <sub>65</sub> N <sub>15</sub> O <sub>12</sub> S <sub>2</sub>
<b>Sequence</b>	Cys-Tyr-Phe-Gln-Asn-Cys-Pro-Arg-Gly-NH <sub>2</sub>
<b>Purity</b>	
<b>Appearance</b>	
<b>General Information</b>	<p>Arginine vasopressin is a human hormone that is released when the body is low on water; it causes the kidneys to conserve water, but not salt, by concentrating the urine and reducing urine volume. It also raises blood pressure by inducing moderate vasoconstriction. Vasopressin is a peptide hormone. It is derived from a prohormone precursor that is synthesized in the hypothalamus, from which it is liberated during transport to the posterior pituitary.</p> <p>The primary effect of vasopressin is to increase water reabsorption in the kidneys</p>
