

Product Specification Sheet

Cat # PSA14-M	Monoclonal Anti-Human free prostate specific antigen (fPSA) IgG	Size: 100 ug
Cat # PSA14-M-1	Monoclonal Anti-Human free prostate specific antigen (fPSA) IgG	Size: 1000 ug

Antigen	Human PSA
Host Animal	Mouse
Isotype	IgG1
Affinity constant	2×10^{10} l/mol
Form	Protein A/G affinity purified from ascites fluid supplied in PBS, pH 7.4 and 0.1% sodium azide as preservative
Antibody concentration	1 mg/ml
Storage	Short term at 2-8oC; Long term at -20oC
Stability	~1 year or more at -20oC; Avoid repeated freeze and thaw.
Specificity and crossreactivity	Specific for free PSA, epitope 1. Does not cross-react with human kallikrein 2; No cross reactivity with Human Albumin, AFP, CEA, PAP, CA-125, CA 19-9 or CA 15-3.
Suggested Usage	Suitable for ELISA as Tracer antibody; concentrations and coating conditions must be optimized for the assay. recommended as a pair with #PSA13-M (capture or coating)
MSDS Info	Contains minimal concn of sodium azide (sigma). Consult the handling and disposal recommendations of sodium azide

PSA14-M PSA14-M-1 70309A
