

Product Data Sheet

---

Cat # RP-1442      Recombinant Treponema pallidum p17 (Partial)      **Size:** 100 ug

---

Treponema pallidum is a gram-negative spirochaete bacterium and is considered to be metabolically crippled. There are at least four known subspecies: T. pallidum pallidum, T. pallidum pertenuis, T. pallidum carateum and T. pallidum endemicum. The helical structure of T. pallidum pallidum allows it to move in a corkscrew motion through viscous mediums such as mucus. Treponema pallidum sub sp. pallidum has one of the smallest bacterial genomes at 1.14 million base pairs (Mb) and has limited metabolic capabilities, reflecting its adaptation through genome reduction to the rich environment of mammalian tissue. Immunoreactive with sera of Trp. Pallidum infected individuals.

This item is for LABORATORY RESEARCH USE ONLY.

RP-1442      120430P

**SOURCE:**

The E.Coli derived recombinant protein contains the T. Pallidum p17 immunodominant regions. The protein contains beta- galactosidase (114 kDa) fused at the N- terminus 8M urea, 20mM Tris-HCl pH-8 and 10mM B-ME.

**APPLICATION AND SUGGESTED DILUTIONS:**

Treponema Pallidum protein is suitable for ELISA and Western blots, excellent antigen for detection of Trp. Pallidum with minimal specificity problems. Treponema Pallidum protein protein is >90% pure as determined by 10% PAGE (coomassie staining). Users must optimize the appropriate concentration and conditions for each assay.

**STORAGE & STABILITY:**

Treponema Pallidum protein is shipped at ambient temperature. Upon arrival, Store at -20°C. Five years frozen. One month in solution at room temperature. If supplied in powder then reconstitute it in 100ul water for 1mg/mL stock and store in liquid at 4°C for ~ 1 week or aliquots in suitable size and store at -20°C for long term storage.

**USAGE:**

---

Alpha Diagnostic Intl Inc., 6203 Woodlake Center Dr, San Antonio, TX 78244, U S A;

**India Contact:**

**Life Technologies (India) Pvt. Ltd.**
