

Product Information Sheet

CaCl₂

C266

Calcium Chloride Anhydrous

Synonym:

CAS: 10043-52-4

Formula: CaCl₂

Molecular Wt: 110.98

Properties

Form: Powder

Appearance: White Powder

Application: Plant Macronutrient

Solubility: Water

Typical Working

Concentration:

Storage Temp: Room Temperature

Storage Temp of

Stock Solution:

Other Notes: Plant Tissue Culture Tested

Application Notes

References

Merck 13, 1660

Revised 3/2007
