Product Information Sheet

Application Notes

Plant species: *Vicia hajastana* (Kao & Michayluk, 1975); *Vicia faba* (Binding & Nehls, 1978); *Daucus carota* (Grzebelus et al, 2012).

This medium was originally developed for the culture of *Vicia hajastana* protoplasts. The culture of low cell densities (1-2 cells/ml) is enhanced when the medium is supplemented with organic acids, sugar alcohols, sugars, plant growth regulators and amino acids. Cell growth and division could also be enhanced by raising the concentrations of calcium chloride from 1 to 5 mM.
