Product Information Sheet

L473

Linsmaier & Skoog Modified Basal Medium w/ 30 g/L Sucrose pH Adjusted and Buffered

Synonym: Murashige & Skoog (MS) Medium with Minimal Organics (MSMO)

Properties

Form: Powder

Appearance: White to Yellow Powder Application: Plant Tissue Culture

Solubility: Water

Typical Working

35.53 q/L

Concentration:

Storage Temp: 2 – 6° C

Storage Temp of Preparation of concentrated solutions is not recommended as insoluble

Stock Solution: precipitates may form.

Other Notes: Contains the macro- and micronutrients and vitamins as described by

Linsmaier and Skoog (1965).

Formula (mg/L)

Ammonium Nitrate	1650
Boric Acid	6.2
Calcium Chloride, Anhydrous	332.2
Cobalt Chloride•6H ₂ O	0.025
Cupric Sulfate•5H ₂ O	0.025
Na ₂ EDTA•2H ₂ O	37.26
Ferrous Sulfate•7H ₂ O	27.8
Magnesium Sulfate	180.7
Manganese Sulfate•H ₂ O	16.9
Molybdic Acid (Sodium Salt) •2H ₂ O	0.25

Potassium Hydroxide	100
Potassium Iodide	0.83
Potassium Nitrate	1900
Potassium Phosphate, Monobasic	170
Zinc Sulfate•7H ₂ O	8.6
MES (Free Acid)	1000
myo-Inositol	100
Sucrose	30,000
Thiamine•HCl	0.4

Application Notes

Plant Tissue Culture Tested

This medium is the standard Murashige & Skoog (MS) basal salts supplemented with Linsmaier and Skoog vitamins. The medium is pH adjusted and buffered with MES. Under most circumstances, adjusting the pH is not necessary; simply add water and any desired PGR's, gelling agent, or other supplements. The addition of MES will help to stabilize pH fluctuations during media preparation and culture.
